

## OUR FASHION LETTER.

New Ways of Braiding a Boon to Mothers of Girls.

## SCHOOLGIRLS' ATTIRE IMPORTANT

Kilted Skirts Still in Favor and Plain Tailored Skirt Waists With Fancy Buttons the Proper Thing. Shoes Now Have Pointed Toes.

Kilted skirts are still in high favor for young girls' suits and dresses—they're too useful and becoming a style to be dropped in a hurry—and are at their prettiest when applied to plaid suitings.

Skirt waists for girls are rather plain tailored affairs trimmed perhaps with fancy buttons. Longish blouses are made with long sleeves in absolute contradiction to the modes of the older ones, for short sleeves savor of more

DRESS OF NATIVE VOILE

or less formal occasions, and nothing in the way of formal occasions must be connected with girls' clothes.

New ways of braiding are a boon to the woman whose sixteen-year-old daughter is growing "out of all bounds" for under those buildings clever pieces are connected which make the wearers look of letting down somewhat easier. Bands offer the same opportunity, especially those graduated ones with the latest one perhaps twice the width of the top.

A charming blouse for a young girl is of tucked crepe de chine in pale blue, with a yoke of Paris guipure veiled with double chiffon. The folded scarfs crossing the shoulders are inset with herringbone stitching, made with coarse silk of the same color. The yoke forms a point at the back, and the scarfs form a pointed point below the yoke. The sleeves are made on a fitted foundation of the crepe, and the full bell overpart and the deep folds are arranged upon this.

The gown in the cut is of a pale mauve voile. The skirt about the waist is disposed in plaits and trimmed at the bottom with velvet ribbon several shades darker than the voile. The jaunty little jacket has a tiny vest of white cloth adorned with small gold buttons, and the velvet trimmings on the jacket are caught through gold buckles.

**SKIRTS AND WAISTS.**  
Long flowered silk jackets worn over lace or chiffon gowns are very effective for reception costumes. But the long silk jacket effect is rarely worn by the

A REMNANT BLOUSE

evening, although silk and satin boleros are to be seen on many of the main and velvet ball gowns.

Extremely polished shoes are the models promised for the spring.

Handsome marked tortoise shell combs delicately incised with a network of paste along the entire length, or at either end with a graceful design in enamel in the middle are considered the most up to date styles in combs.

Black canvas skirts plaited and ready to be sewed up the back are to be purchased in the shops. One handsome example was elaborately embroidered in black silk several feet around at the bottom and sells for \$25, including material for the waist.

The blouse in the cut is a remnant affair that well fulfills its destiny, being composed, as it is, of three different materials in quite short lengths. The vest is of guipure lace, the pretty bertha is of silk, while any soft falling fabric is used for the blouse part and short elbow sleeves.

**A MODISH CHAPERON.**  
Black and white stripes are to be smart this spring, are almost inevitable. There is a red and white woolens that Paris is inclining over.

Smooth faced clothes are in evidence for street suits, and the rough weaves seem for the time to be decidedly out of it.

The circular skirt, usually in two pieces, will share honors with the plain

WHITE CHIP HAT

gored jupe. About the belt the new skirts are tucked, knife plaited or shirred. The many rows of gathers that were recently thought modish have not returned to favor.

The new ribbons are wonderfully lovely and are used in many ways besides the traditional sash and girdles. Wide, soft ribbons are folded into fluted-like corsage trimming and also into draped waistcoats. They are set into skirts with open stitching or with lace bands and are used for cuffs, revers, girdles, knois and bows.

Bonnets have come into fashion for children and not only for very wee folks, but those of a more advanced age. The bonnets are of an old fashioned shape, with large scooped fronts, the brims in many cases being composed entirely of mouseline de sole and lace, with a tiny fell in front.

The dainty chapeau pictured is of white chip. The ribbon about the crown is a plaited affair carried out in cream and green shadings. The feathers are creamy white, toning into a light rose-tint.

**SUMMER FABRICS.**  
There are any quantities of charming materials for this summer gown, including dimities in dainty little stripes and floral designs. Tiny pla dots are another popular fancy.

A delightful gossamer blue linen frock has its full skirt laced with a four leaf band of Irish lace. An all over design in this same lovely lace makes the short, straight jacket, bound and strapped with blue linen. The jacket is woven with an exquisitely fine lingerie waist of tucked handkerchief linen absolutely devoid of trimming other than

**BLACK AND WHITE WOOLEN SUIT.**  
self adornment. A blouse of this description shows the design in the jacket to perfection.

A number of the simplest and prettiest of the summer gowns are tucked. The skirt, for instance, will have a deep ruche tucked at the bottom and plaited to the skirt under three or four deep tucks. The bebe bodice will be vertically tucked and also the puffed elbow sleeves.

Trimming this spring and summer will be that, a particularly effective adornment for afternoon gowns being prussels net with rings of velvet as large as a quarter.

Avoid fuss sleeves in your tailor made frock. They may be becoming, but are decidedly out of place on a dress of this kind.

White lace gowns have the pattern of the flowers on the lace outlined with colored embroidery silk or narrow ribbons in palest shades.

The spring gown illustrated is of black and white checked woolen. The skirt is in three fitted flounces, each one trimmed with scrolls of black velvet. The bolero jacket, which is a smart little wrap with shoulder capes, is ornamented with the velvet scrolls.

JUDIE CHOLLET.

**Why a Dog Toots Sideways.**  
It is said that a dog toots sideways so that his hind feet will not strike his fore feet. That seems to be a reasonable explanation for it he is harnessed in a small wagon, between shafts, so that he cannot turn his body to one side, his feet will often come into collision. When he toots sideways, however, one hind foot goes between the fore feet and the other outside.

**A Messenger.**  
Little Jack by the seaside stands, Watching the setting sun. He runs to the beach at evening, For his day of play is done.

The father has gone to the China seas And Little Jack is left behind On the edge of Long Island shore.

He kisses his hand as the sun sinks down And murmurs a message low, When you shine on father tomorrow morn.

Just tell him Jack says "Hello." Supper is ready," the black nurse calls. Black answers: "I can't come, Dada. The sun has a message to give to dad. I'll wait till he gets to China."

—St. Nicholas.

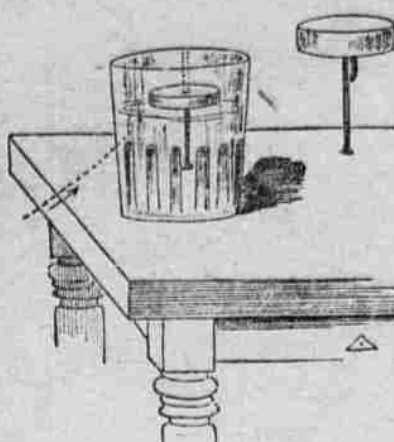

## THE PHANTOM PIN.

A Toy That Teaches a Lesson in Light Reflection.

It is possible at times to get more than mere amusement out of toys. There are some toys that will instruct as well as amuse, and while the phantom pin may not be in the strict sense of the word a toy, it will amuse and instruct you at the same time, for it will serve the purpose of giving you a little lesson in the properties of the reflection of light. This is the way the phantom pin is managed:

Take a cork and cut it into the form of a disk of about the thickness of an

THE WAY TO ARRANGE THE PIN.

luch in its center stick the point of a pin. This done, take a glass about three-quarters full of water and place the cork upon the surface of the liquid with the pin below.

Now if you will look at the cork from above you will not see the pin, but if you will alter your position and diminish the angle of the vision ray by placing the eye on a parallel with the table on which the glass rests you will perceive a pin above the cork.

## WIT SHARPENERS.

A Game in Which the Players Must Think Quickly.

A delightful home game for children is as follows:

"I see something in this room that begins with R," says the one to the right of mamma.

Now, this person may have ring, rug, or rocker in his mind. Immediately the guesser will begin, "I see a 'racer' and so on. The one guessing correctly will have his turn. If he select a compound word, as watch-chain, he would give the initial letter of each word, "I see something in this room that begins with w-c."

When tired of this they can change it somewhat by saying:

"Now, let's furnish a house." "I donate a carpet," says "it." The one on his left instantly takes it up, using the last letter of carpet as his initial.

He will perhaps say, "And I will furnish a table," while the next will use the last, "e," of table as the beginning letter of his furnishing, as "couch."

If one cannot think of anything before "it" counts ten he must go foot or pay a forfeit.

When tired of the house the window will furnish entertainment of the same sort. "I see rain," cries one. "Next," says the next. "Thrush," "hill," "lattice" and "evergreen" will follow in quick succession.

This game is capable of an almost limitless number of variations. The children can plant trees or a vegetable garden. They can have the maple, elm, mulberry, yew. They may safely place in the ground peaches, okra, rice, egg plant and tomato, or they may deal in flowers in the same manner.

## A Curved Ball.

Many boys do not understand why a ball may be made to curve in its flight. Here is the explanation: When a ball is thrown it is retarded in its forward motion by the resistance of the air, which exerts a pressure not only on the face of the ball, but a resisting force on its sides by friction. If the ball be simply thrown forward the friction of the air will be equal on each side of it, but if one side be made to move faster than the other—that is, if the ball be made to rotate on its own axis so as to increase the lateral friction—the natural result is a curve in the direction of the side on which its motion has been retarded. That is the philosophy of a "curved ball."

## WHAT SISTERS MAY DO.

Ways in Which They May Be of Help to Their Brothers.

A sister can help to cure a brother of a boy's natural awkwardness and blundering by saying all the pleasant things she can of him in his hearing.

She can do more for him by encouragement than by rebuke. Boys flourish best in a kindly atmosphere.

She can take an interest in his fads and amusements and listen to him whenever he has anything to tell. In this way she becomes his most valuable confidant and comrade.

She can make her brother's friends her friends by being ready to entertain them when they call. She should not be continually finding flaws in them or holding them up to ridicule.

She can teach them to be manly by occasionally claiming his protection, and he will be quick to respond to such a call.

She should say nothing to her brother's disparagement before strangers. Harsh treatment will only result in hard heartedness.

Brothers stand in need of as much sympathetic affection as girls, and sisters should see that they get it.

In this way sisters can teach their brothers to be as fond of home as they are, and a fondness for home will keep any boy from straying from that path which leads to a noble manhood.—Exchange.

## KITCHEN APRONS.

They Should Be Made Pretty as Well as Serviceable.

When making kitchen aprons be sure to bring the corners well round to the back, so that the back or sides of the dress will be protected. Have the belt long enough to tie, for if it is short the needed pin is generally missing, and a button soon comes off in the laundry. Make aprons long as well as wide, and the advice to add a ruffle to the lower edge is good, for a ruffle will catch most of the dirt and save the dress beneath.

It is a good idea to ornament some of the work aprons a little, for somehow when one has a starched gingham apron with a little cross stitch vine work across it she is twice as careful of it as when an old faded print apron is worn. So many of the soft, fine white cottons are now made that the stock of aprons need never be low. Make them at home, for the dainty cloth and coarse machine stitching of the ready made aprons are no credit to the wearer. One cannot wear the handsome white aprons such as cooking teachers wear while there are pots and kettles to wash, but more of the daintiness of the lecture room could with profit be adopted in most kitchens.—Chicago Inter Ocean.

## CULINARY CONCEITS.

Prune juice on dry cereals makes a nice change from cream.

Cold baked potatoes sliced thin, then put in a baking dish with salt, pepper, butter and milk, make a better scalloped than raw potatoes.

Heavy straws through a cake will undoubtedly appear if the butter and sugar are not thoroughly beaten or if the butter is not properly rubbed into the flour.

Do not dress salads with sugar and vinegar or salt and vinegar. The latter is an admirable combination for scouring brass, but it is not good for one's stomach. Use a mixture of oil and vinegar, lightly seasoned.

Cauliflower should be placed head down in cold salted water for ten or fifteen minutes before cooking to draw out insects. In boiling slightly salted water should be used, and the head should be placed downward in the kettle.

## The Sunbonnet Boss.

Mrs. W. E. Morgan of Missouri is boss of one of the most fine mines in that state. To her employees she is known as the "Sunbonnet Boss," and they are said to like her and work well under her directions. Garbed in rubber skirt, coat, hat and boots, she goes down into a mine when necessary, and she is on the ground to superintend operations. It is said to be due to her business foresight that the mine is being worked safely, for the property had been condemned as worthless and was lying fallow, a combination of dump pile and waste when Mrs. Morgan saw its possibilities. She organized a company, purchased the engine, pump and other necessary machinery, employed the men, drained the mine and sank the shaft deeper, and now is rewarded by a rich yield of zinc ore.

## THE PORCUPINE.

He is Noted Chiefly For His Sluggishness and Stupidity.

The porcupine can hardly be said to have a home, but he uses a hollow tree as a den, or even a hole among the rocks. As warm weather approaches the female produces two or three young, which are of amazing size at birth, actually larger than the newborn cubs of a bear.

Their flesh is eaten by the Indians, but has never been liked by white men. The use of the quills in ornamentation by our Indians is well known, robes, garments, mocassins, pouches, weapon cases, baskets and everything else being ornamented with them by the squaws with great skill and often with true artistic effect; but, as usual, the earliest methods and patterns, when the Indians used their own delicate dyes and sinew threads, were much better than are seen in these days of milline colors and crude imitations of the white man's art. The longer quills of the European porcupine are turned into fancy penholders, and in India and Malaya they weave little baskets, etc., out of them, which are often as pretty as they are strange.

Reviewing his narrow life, the strongest impression left upon one's mind seems to be that of the creature's sluggishness and stupidity. These are perhaps concomitants, for not consequences, of its strictly vegetarian life, in which its tastes are so simple that it rarely seems to have to make the least exertion for food at any season of the year, and to its highly protected condition, which makes it careless of danger, and hence unvigilant and steadily inclined to sluggishness of mind as well as of body. It is not well for an animal to be too safe or too comfortable, for its mind grows rusty with disuse, or, if it never had use, lies inert, and the whole creature exists on a low plane. I do not know an animal of the American woods that is so well off and so uninteresting as the porcupine.—New York Post.

**DROPS**

TRADE MARK

**CURES**

**RHEUMATISM**

**LUMBAGO, SCIATICA**

**NEURALGIA and KIDNEY TROUBLE**

"DROPS" taken internally, rid the blood of the poisonous matter and acids which are the direct causes of these diseases. Applied externally it affords almost instant relief from pain, while a permanent cure is being effected by purifying the blood, dissolving the poisonous substance and removing it from the system.

**DR. S. D. BLAND**

Of Brown, Guerin & Co., Chicago

"I had been a sufferer for a number of years with Lumbago and Sciatica in my arms and legs, and tried all the remedies that I could get from medical works, and also consulted with a number of the best of my friends, but nothing that gave the relief obtained from 'DROPS'."—J. H. B. (a prominent citizen of Chicago).

**FREE**

If you are suffering with Rheumatism, Neuralgia, Kidney Trouble or any kind of disease, write to us for a trial bottle of "DROPS," and test it yourself.

"DROPS" can be used any length of time without acquiring a "drug habit," as it is entirely free of opium, cocaine, alcohol, laudanum, and other similar ingredients.

Large Size Bottle, "DROPS" (500 Drops) \$2.00. For sale by Druggists.

**SWANSON RHEUMATIC CURE COMPANY,**  
Dept. 80, 160 Lake Street, Chicago.

**FOR SALE**—I will sell, on easy payments, my handsome country home on the road leading to Fall mill, and one mile from the Court House. The place consists of 4 and one half acres, with a seven room house, and stable and wash house, a 120 barrel cistern; also a large well. Inquire of Joe Brookier, Bishop Block, Main Street, Logan, Ohio

## Legal Notice.

Michael Shannon whose residence is unknown will take notice that E. W. Sanner, Administrator of the estate of Sarah A. Shannon deceased, on the 22 day of February 1906, filed his petition in the Probate Court within and for the county of Hocking and State of Ohio, also for a that the personal estate of said decedent is insufficient to pay her debts and the charges of administering her estate; that she died seized in fee simple of the following described real estate to-wit: Lot No. 12, Block 11, Building at the North East corner of Lot No. 3, of the subdivision of Section Twenty-eight (28), Twp. 12 N., R. 10 E., Co. 10, Ohio, also for a that the said Michael Shannon, administrator, is entitled to a decree of the court for the sale of said premises, subject to such a decree, for the payment of the debts and charges aforesaid.

The person first above mentioned will further take notice that he has been made a party defendant to said petition and that he is required to answer the same on or before the 1 day of April A. D. 1906.

E. W. SANNER,  
Administrator,  
aforesaid.

Feb. 22, 1906. G.W.

## Notice of Appointment.

Estate of T. P. Spahr, deceased. The undersigned has been appointed and qualified as administrator of the estate of T. P. Spahr, deceased, of the County of Hocking, Ohio, on the 28th day of February A. D. 1906.

J. T. SANDERSON,  
Administrator.

March 3, 1906.

## Notice of Appointment.

Estate of Henry Myers, deceased. The undersigned has been appointed and qualified as Executor of the will and of the estate of Henry Myers, deceased, of the County of Hocking, Ohio, on the 28th day of February A. D. 1906.

SHERIDAN MYERS,  
Executor.

March 3, 1906.

## Probate Notice.

Notice is hereby given that the following Accounts and Vouchers have been filed in the Probate Court of Hocking County, Ohio, for first and final settlement: J. L. West, Administrator of the estate of Ephraim Harden deceased, and the same will come on for hearing on the 28 day of March A. D. 1906, at the Court House in Logan, Ohio, and thereafter, as may be convenient.

F. P. MARTIN,  
Probate Judge.

March 1, 1906.

## Sheriff's Sale.

Lydia B. Rickerts  
vs  
Helen L. Floyd, et al.

In the Court of Common Pleas of Hocking County, Ohio.

Notice is hereby given, that the undersigned, Sheriff of Hocking County, Ohio, by virtue of an order issued out of said Court in the above entitled case, and to him directed by a Sheriff of said County, will, at the door of the Court House in Logan, Ohio, on

Saturday, March 17, A. D. 1906

at one o'clock p.m., of said day, offer for sale at public auction, the following lands and tenements, situate in Hocking County, Ohio, to-wit:

The south-east quarter of Section twenty-six (26), Township thirteen (13), Range sixteen (16), containing one hundred and sixty (160) acres more or less.

Terms of sale—One third (1/3) cash, one third (1/3) in one year. One third (1/3) in two years. Bids of no more than to be secured by mortgage on the property. Notes to bear interest at six per cent.

Given under my hand at Logan, Ohio, this 2nd day of January A. D. 1906.

J. H. B. (a prominent citizen of Chicago).

Edwin D. Rickerts, Atty. for Plt.

# ORINO Laxative Fruit Syrup

Pleasant to take and does not gripe or nauseate

## Cures Chronic Constipation, Stomach and Liver Trouble

## Stimulation Without Irritation.

Orino Laxative Fruit Syrup is a new laxative syrup combined with the delicious flavor of fruits, and is very pleasant to take. It will not gripe or sicken. It is much more pleasant and effective than Pills, Tablets and Saline Waters, as it does not derange the Stomach, or irritate the Kidneys, Liver or Bowels.

## Constipation.

Orino Laxative Fruit Syrup will positively cure chronic constipation as it restores the natural action of the intestinal tract. Ordinary cathartics may give temporary relief but the stomach is upset and the bowels are irritated without any permanent benefit having been derived.

The condition of the patient remains unchanged. The Stomach, Liver and Bowels have not been stimulated and in a few days a stronger purgative may have to be taken. This is why Pills and Aperient Waters never give permanent relief. Their violent action results in an unnatural movement of the bowels and it is necessary to keep taking them indefinitely.

## Why ORINO is different.

ORINO Laxative Fruit Syrup is the only preparation that really acts upon all of the digestive organs. Other preparations act upon the lower bowel only and do not touch the Liver. It can very readily be seen that a preparation that does not act upon all of the digestive organs

can not cure Chronic Constipation, Torpid Liver, Indigestion, Sour Stomach, etc.

## For Bilioessness and Sick Headache.

Take ORINO Laxative Fruit Syrup. It sweetens the stomach, aids digestion and acts as a gentle stimulant on the liver and bowels without irritating these organs.

## Clears the Complexion.

ORINO Laxative Fruit Syrup stimulates the liver and thoroughly cleanses the system and clears the complexion of pimples and blotches. It is the best laxative for women and children as it is mild and pleasant, and does not gripe or sicken. Refuse substitutes

**OUR GUARANTEE** Take ORINO Laxative Fruit Syrup and are not satisfied your money will be  
Prepared only by FOLEY & CO., Chicago, Ill.
